Information Retrieval/Knowledge Discovery
WANTED: Java web developer (m/f), full-time

We are looking for a creative Java developer to reinforce our team in Vienna and surrounding area, the beautiful Viennese Woods. You will work in the fields of **knowledge discovery** and **retrieval** with our application framework „m2n Intelligence Management". You can expect an optimal working environment, creative leeway and interesting assignments.

m2n - consulting & development gmbh is an Austrian research and development enterprise which focuses on cutting-edge technologies in the fields of model based application development and knowledge discovery. We implement innovative solutions for our customers in the public sector and industry in the context of R&D projects and in close cooperation with our national and international partners.

Your skills and qualification:

- You hold a BSc or MSc in computer science (or equivalent)

- You bring excellent knowledge of object oriented Java software engineering

- You are interested in information retrieval and/or familiar with frameworks such as lucene and methods like named entity recognition, classification and clustering.

- You are interested in semantic technologies

- You perform independent and proactive

- You like solving complex assignments and are open for creative concepts; you like the idea of working in an innovative area with contact points to current research

- You're a team player and bring the ability to assert yourself

Your tasks:

- You are responsible for the analysis, design, (further) development and documentation of components in the fields knowledge discovery and retrieval as part of our team

- You plan and execute quality assurance measures self-dependently

We offer:

- Varying and challenging tasks in a young and dynamic team

- Exciting assignments in cutting-edge fields and creative leeway

- Work on national and international client and research projects

- An optimal working environment with freedom for individual development; in Vienna at the Code-Farm – which comes with a pool and a park

- Optional university level research and/or PhD possibilities

- Self-determined, flexible working hours

- Payment according to Austria's collective agreement for IT and your skills

We support you in any administrative issues, apartment-hunting and your relocation to Austria. The m2n-family is looking forward to meeting you in the beautiful Vienna Woods!
